

How can I share a private ePortfolio as a student?

Sharing a private ePortfolio link will give others access to viewing your ePortfolio without having to log into Canvas.

Open ePortfolios

In Global Navigation:

1. Click the [Account](#) link.
2. Click the [ePortfolios](#) link.

Open ePortfolios

My ePortfolios

  My ePortfolio
1 page last updated Jan 31 at 3:28pm

3. Click the title of the ePortfolio.

Share ePortfolio

Your ePortfolio is Private

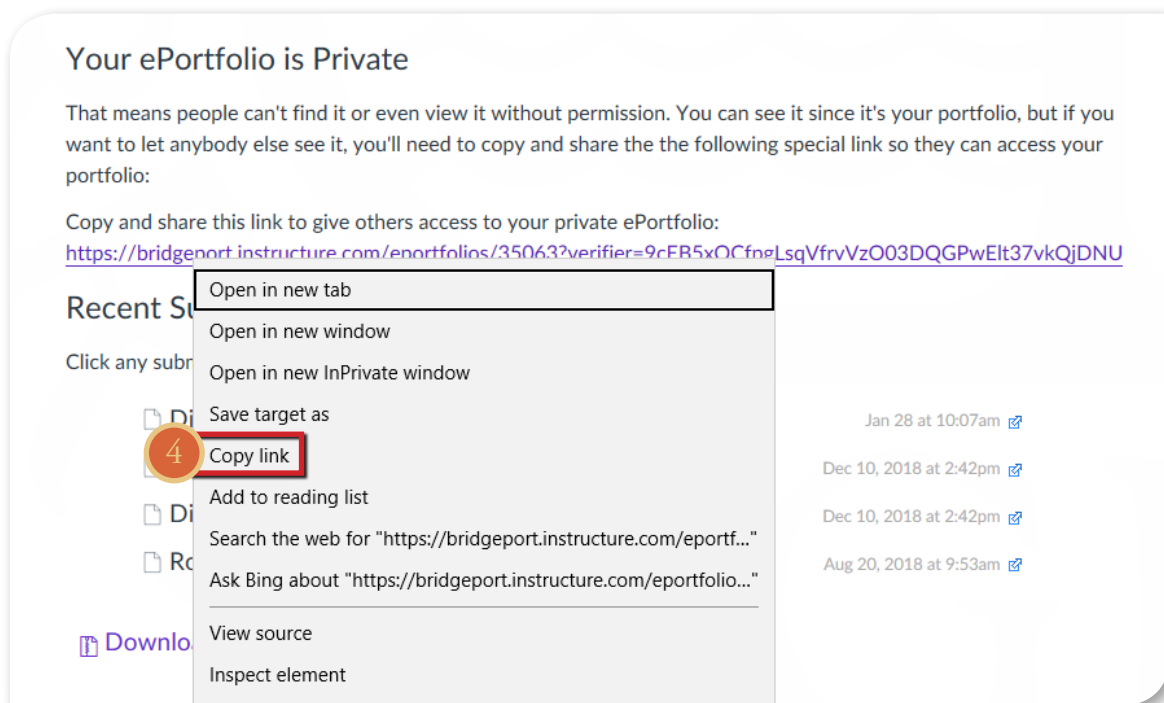

That means people can't find it or even view it without permission. You can see it since it's your portfolio, but if you want to let anybody else see it, you'll need to copy and share the the following special link so they can access your portfolio:

Copy and share this link to give others access to your private ePortfolio:

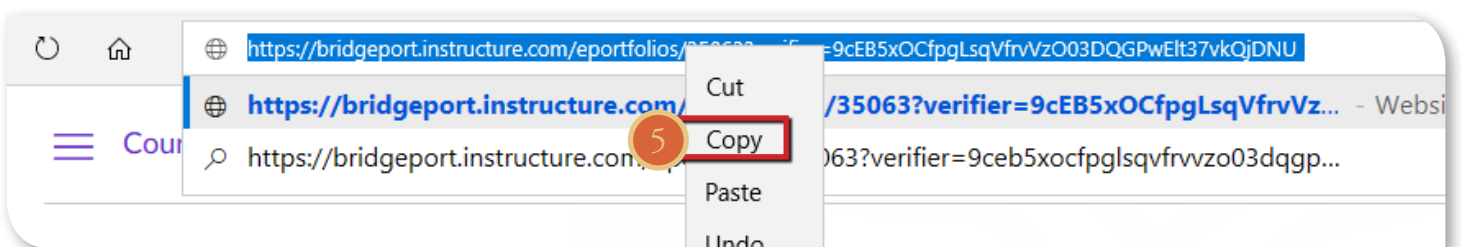

<https://bridgeport.instructure.com/eportfolios/35063?verifier=9cEB5xOCfpgLsqVfrvVzO03DQGPwElt37vkQjDNU>

All ePortfolios are automatically set to be private. This means that only you can see the contents of the portfolio. To share your ePortfolio, you will need to copy and paste the link into an email or other sharing utility.

Copy ePortfolio Link

4. To copy the ePortfolio link, right click the share link and select the **Copy link**.

5. You can also click the share link and the URL will appear in your address bar. Highlight the link, right click, and select the **Copy link**.
