

How do I create a new ePortfolio as a student?

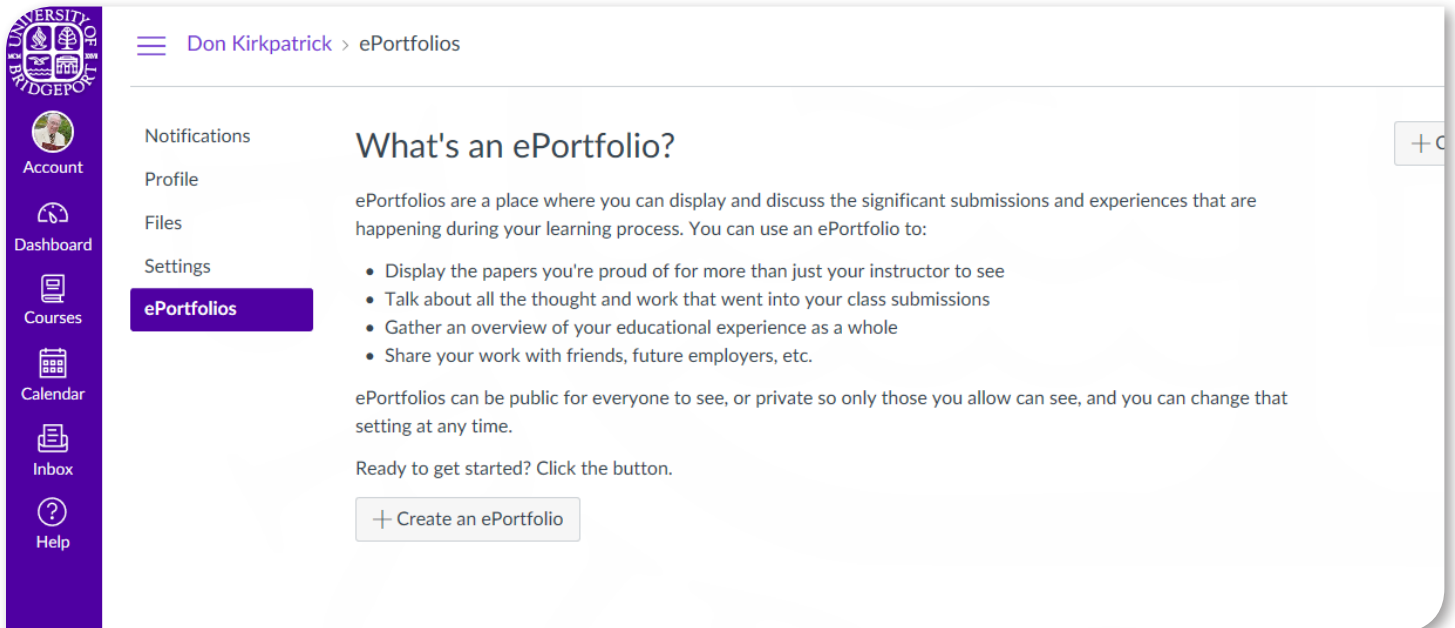

Open ePortfolios

In Global Navigation:

1. Click the [Account](#) link.
2. Click the [ePortfolios](#) link.

What's an ePortfolio?

ePortfolios are a place where you can display and discuss the significant submissions and experiences that are happening during your learning process. You can use an ePortfolio to:

- Display the papers you're proud of for more than just your instructor to see
- Talk about all the thought and work that went into your class submissions
- Gather an overview of your educational experience as a whole
- Share your work with friends, future employers, etc.

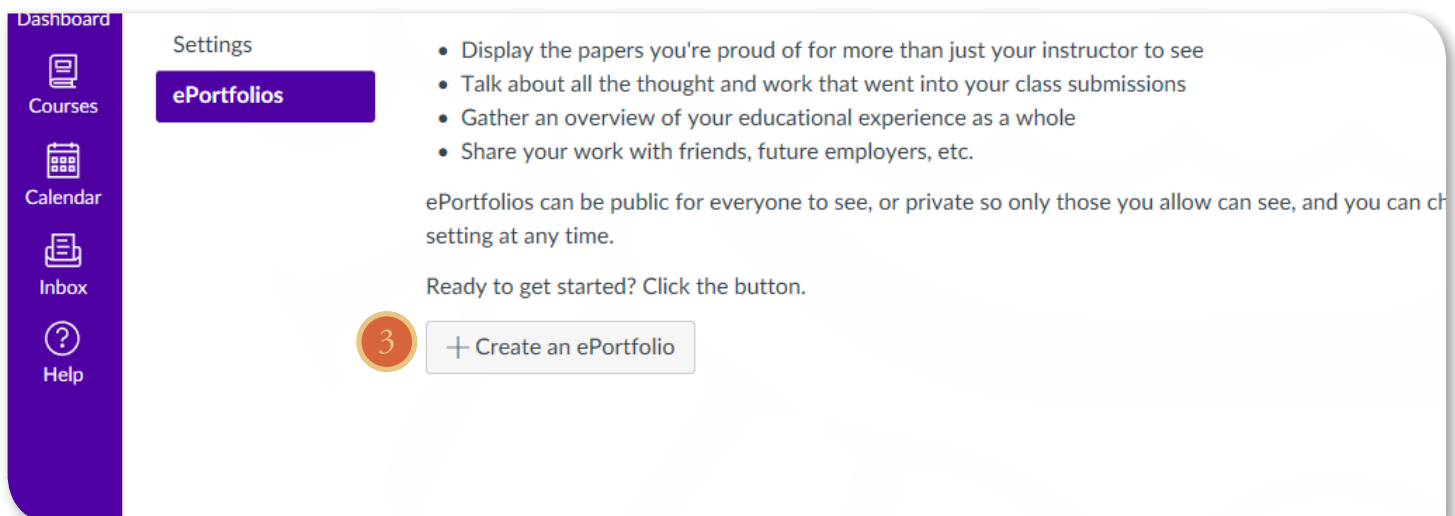

ePortfolios can be public for everyone to see, or private so only those you allow can see, and you can change that setting at any time.

Ready to get started? Click the button.

+ Create an ePortfolio

The first page you will see will explain what an ePortfolio is and how it is used.

ePortfolios can be public for everyone to see, or private so only those you allow can see, and you can change that setting at any time.

Ready to get started? Click the button.

3 + Create an ePortfolio

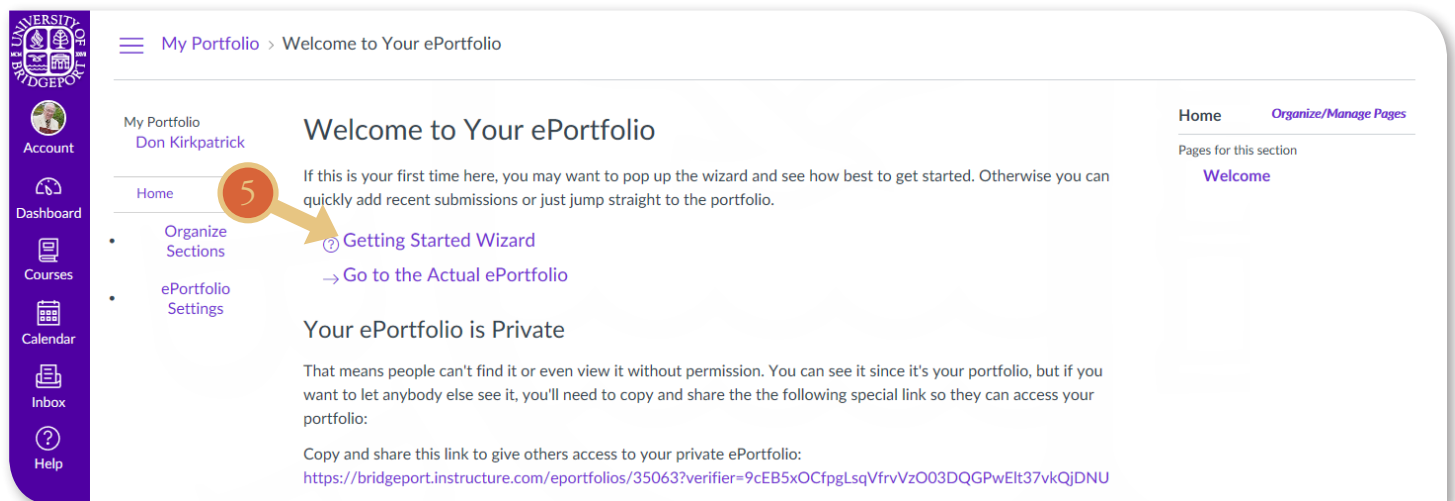

3. Click the **Create an ePortfolio** button.

Create ePortfolio

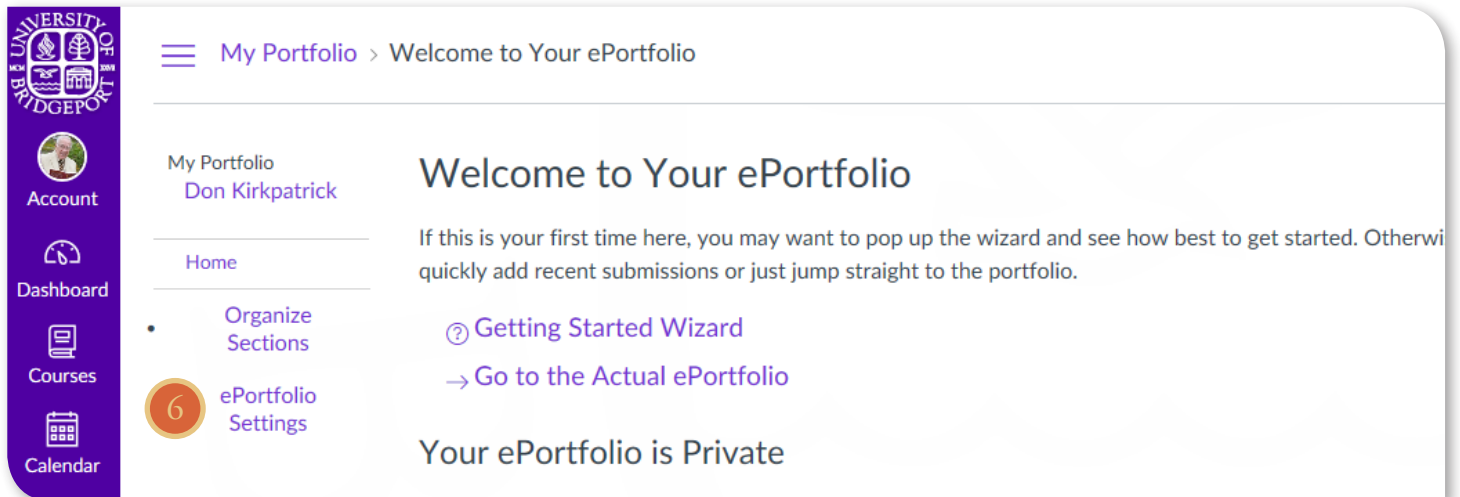

4. Name your ePortfolio by typing in the ePortfolio Name field [1]. Decide if your ePortfolio will be public [2] (you can change this setting later) and then click on the **Make ePortfolio** button [3].

View ePortfolio

5. Once the ePortfolio is created, there are several options for creating content for your portfolio, including a wizard that will walk you through your creation, step by step.

Edit ePortfolio

Your ePortfolio is Private

6. To edit your ePortfolio settings, click the ePortfolio Settings link.

Edit ePortfolio

Your ePortfolio is Private

That means people can't find it... it's your portfolio, but if you want to let anybody else see it, yo... link so they can access your portfolio:
